

Vasily Kokorev

ORCID: [0000-0002-5588-9156](https://orcid.org/0000-0002-5588-9156)
 address: PMA, Speedway 2515
 78712, Austin, TX, USA
 email: vkokorev@utexas.edu
 github: github.com/VasilyKokorev

research interests: High-redshift galaxies; LRDs; AGN; JWST photometry; JWST spectroscopy; Interstellar medium; Infrared astronomy; Sub-mm galaxies; SED-fitting; Galaxy-catalogues;

Research Positions

University of Texas, Austin, USA

Hubble Fellow

Cosmic Frontier Center Prize Fellow

Mentors: Prof John Chisholm, Prof Steven Finkelstein

Sep 2026 –

May 2024 – Sep 2026

Kapteyn Astronomical Institute, University of Groningen, NL

Postdoctoral Researcher

Advisor: Prof Karina Caputi

Oct. 2022 – Apr. 2024

University of Texas, Austin, USA

Visiting Graduate Student

Topic: Peering into the Unknown with JWST/MIRI

Advisor: Prof Caitlin Casey

January - March 2022

University of Sussex, UK

Summer Research Fellow

Topic: Luminosity Function of Galaxy Clusters with GAMA

Advisor: Dr Jonathan Loveday

2014–2018

Education

DAWN, Niels Bohr Institute

PhD in Astrophysics

Thesis: Charting the Stellar, Dust and Gas Content of Galaxies

Advisor: Prof Georgios Magdis, Co-advisor: Prof Gabriel Brammer

Copenhagen, DK

Oct. 2018 – Aug. 2022

University of Sussex

Master of Physics (MPhys), 1st class Honours

Thesis: Single Dish Radio Astronomy at 1.42 GHz

Advisor: Dr Mark Sargent

Brighton, UK

Sep. 2014 – June 2018

Publications

Total of 193 scientific articles, including **11 as a first author**. > 11000 total citations. First and second author citations > 1100. Full publication list can be found at the end of CV.

Talks/Posters

44 science talks, **11** invited.

Exgal Seminar, University of Toronto June 2026,

LRD Workshop, Online, June 2026,

Metal Poor Frontier, STScI, USA, May 2026

University of Tokyo, April 2026

JWST Sakura Conference, Tokyo, March 2026,

1st Billion Years Conference, Aspen, March 2026,

Galread, Princeton, February 2026,

ITC Lunch Talk, Harvard, February 2026,

MAT Seminar, MIT, February 2026,

CFC Inaugural Conference, Austin, USA, May 2025,

Galaxy CRISOL, Toledo, ESP, May 2025,

Contributed Talk

Sesto High- z - X , IT, Jan 2025,	Invited Talk
IAP Symposium, Paris, FR, Dec 2024,	Invited Review
CCA-CFC Workshop, Austin, TX, Nov 2024	Contributed Talk
Beyond the Edge of the Universe, Sintra, PR, Oct 2024,	Contributed Talk
Origin and Evolution of SMBHs, Sesto, IT, July 2024,	Contributed Talk
Extreme Galaxies, Iceland, May 2024,	Contributed Talk
DAWN Summit, DK, April 2024,	Invited Review
AGN Seminar, NASA Goddard, USA, March 2024	Invited Talk
i2i Workshop, Sesto, IT, January 2024	Invited Talk
AAS243 New Orleans, USA, January 2024	Contributed Talk
University of Leiden, NL, November 2023,	Contributed Talk
University of Massachusetts, Amherst, USA, September 2023	Colloquium
First Year of JWST Science, STScI, USA, September 2023	Contributed Talk
JWST Turns One, Sesto, IT, July 2023	Contributed Talk
DAWN Summit, Copenhagen, DK, June 2023	Contributed Talk
STScI, Baltimore, USA, May 2023	Invited Seminar
COSMOS Collaboration Meeting 2023, RIT, Rochester, USA	Contributed Talk
AAS241 Seattle, USA, January 2023	Dissertation Talk
Kapteyn Science Day 2022,	Invited Talk
SAZERAC SED Forum November 2022,	Contributed Talk
COSMOS Collaboration Meeting 2022, IAP, Paris, FR	Contributed Talk
University of Groningen, NL, July 2022	Seminar
UCLA, USA, June 2022	Seminar
AAS240, Pasadena, USA, June 2022	Dissertation Talk
IPAC/Caltech, USA, June 2022	Seminar
UT Austin, USA, February 2022	Seminar
University of Oxford, UK, January 2022	Seminar
Origins Workshop, Salt Lake City, USA January 2022	Contributed Talk
DAWN, University of Copenhagen, DK, Spring 2021	Seminar
DTU Space, DTU, DK, Summer 2020	Seminar
The art of measuring galaxy physical properties, INAF, Milan, IT	Contributed Talk
COSMOS Collaboration Meeting 2019, Flatiron Institute, New York, USA	Contributed Talk
BUFFALO Collaboration Meeting 2019, University of Las Vegas Nevada, USA	Contributed Talk
Posters in Parliament 2018, London, UK	Invited Poster

Observations and Proposals

Approved Proposals (PI and co-PI) [90+h total]:

Roman

1. Cylce I: Roman 19062, Where Do Little Red Dots Go After Cosmic Dawn? A Wide-Area Roman Census at Cosmic Noon [Medium]

JWST

1. **DDT**: JWST 9493, PIs: D. Coulter, **V. Kokorev**, C. Larison, J. Allingham, SN Eos: A Multiply-Imaged, $30\times$ Magnified SN Near the Epoch of Reionization [10.1h]

ALMA and NOEMA [80+h total]

3. ALMA 2024.1.00876.S Heart of Darkness: The Deepest Intrinsic ALMA+JWST Glimpse of the Early Universe. [49.7h]
2. ALMA 2023.1.00626.S. Spatially Resolving Dust Obscured Star Formation. [30.0h]
1. NOEMA W21CO, Co-PI: C. Gómez-Guijarro. Uncovering a unique population of gas giants at $z = 1.2$. [8.0h]

Select Approved Proposals (Co-I):

JWST [1380+h total]

25. Cycle 5: JWST 10075, PIs: M. Golubchik, L. Furtak, A second multiply-imaged Little Red Dot: Abell383-QSO1 [15.9h]
24. Cycle 5: JWST 11618, PIs: Y. Ma, D. Setton, UV-to-MIR Spectroscopy of the Brightest Little Red Dot at Cosmic Noon, [17.6h]
23. Cycle 5: JWST 9483, PI: T. Tanaka, Pushing Little Red Dots to the Early Universe: Spectroscopic Confirmation of the First Robust $z \sim 10$ LRD Candidate [18.4h]

22. Cycle 5: JWST 10005, PI: F. Sun, Little Red Dots in a Time (Delay) Machine: Monitoring Gravitationally Lensed, Multiply Imaged LRDs over 160 years [32.9h/1.5h-par]
21. Cycle 5: JWST 12299, PI: C. Larison, Catching Eos by the Tail [29.2h]
20. Cycle 5: JWST 10311, PI: P. Rinaldi, Slicing the Saguaro: Dissecting a Little Red Dot Descendant at Cosmic Noon with NIRSpec/IFU [26.7h]
19. Cycle 5: JWST 10264, PI: S. Finkelstein, The First Stars or the Last Stars: Confirmation of a Robust Candidate $z \sim 30$ Galaxy [20.9h]
18. Cycle 5: JWST 11373, PIs: K. Whitaker, R. Bezanson, S. Price, Opening the 5.6-18 μ m Window on the Community Deep Public Frontier Field [76.4h]
17. Cycle 5: JWST 10202, PIs: S. Finkelstein, P. Perez-Gonzales, MIRAGE: MIRI Investigation of Red and Ancient Galaxies in the Early Universe [156.5h/120h-par]
16. **DDT**: JWST 9478, PIs: C. Larison, J. Pierel, SN Ares: A Strongly Lensed, High- z CCSN with Remarkable Time Delays [3.5h]
15. Cycle 4: JWST 6882, PIs: S. Fujimoto, D. Coe, Vast Exploration for Nascent, Unexplored Sources (VENUS) [243h/103h-par]
14. **DDT**: JWST 9223, PIs: S. Fujimoto, R. Naidu, Let there be Light: Directly Witnessing the Birth of Metal-Free, Pop III Stars in an Ultra-Faint Galaxy at $z = 6.5$ [38.7h]
13. Cycle 4: JWST 6796, PIs: S. Fujimoto, J. Chisholm, Resolving Multi-phase Outflow/Inflow via Gas Dynamics and Chemical Abundance Distribution in a Sub- L_* Dwarf Galaxy at $z = 6.1$ [60.9h]
12. Cycle 4: JWST 8204 PIs: J. Greene, I. Labbé, Give me a break: the search for stars in a prototypical Little Red Dot [17h]
11. Cycle 4: JWST:8520, PI: A. Taylor, Balmer Breaks in Little Red Dots: Stellar Populations or Dense Neutral Gas? [10.8h]
10. Cycle 4: JWST, PIs: C. Casey, H. Akins, M. Franco, 7417 - Brightest & Farthest: Confirming intrinsically luminous $z \sim 10 - 12$ Galaxies in COSMOS [48h/18h-par]
9. Cycle 3: JWST 4762, PI: S. Fujimoto, Panchromatic characterizations of the super-Eddington accretion black hole, host, and environment: Epicenter of red dots, mergers, and dusty starbursts at $z = 7.2$ [15.3h]
8. Cycle 3: JWST 5578, PI: E. Iani: The MIRI deep imaging survey of the lensing clusters Abell 2744 and MACS0416 [75h]
7. Cycle 3: JWST 5917, PI: E. Vanzela, Mapping Star Cluster Feedback in a Galaxy 500 Myr after the Big Bang [26.7h]
6. Cycle 3: JWST 5293, PI: X. Xu, Galactic Winds in the Early Universe: observing outflows in emission and absorption in a typical $z \sim 6$ galaxy [10.6h]
5. Cycle 3: JWST 6405, PI: S. Cutler, Clumpy Relics: The First Spectroscopic Confirmation of Globular Clusters at $z \sim 3$ [20.3h]
4. Cycle 2: JWST 2883, PI: F. Sun, MAGNIF: Medium-band Astrophysics with the Grism of NIRCcam in Frontier Fields [39h/19h-par]
3. Cycle 2: JWST 3657, PI: F. Valentino, A deep dive into the physics of the first massive quiescent galaxies in the Universe [47h]
2. Cycle 2: JWST 3538, PI: E. Iani, Unveiling the properties of high-redshift low/intermediate-mass galaxies in Lensing fields with NIRCcam Wide Field Slitless Spectroscopy [64h]
1. Cycle 2: JWST 4246, PI: Abdurro'uf, Physical Properties of a Possible Galaxy Merger at $z=10.2$ [16h]

ALMA

10. ALMA 2022.1.01562.S, PI: S. Fujimoto: Dust in galaxies at $z = 8 - 11$ [19.8h]
9. ALMA 2022.1.00433.S, PI: S. Fujimoto: Where does [CII] 158 μ m originate? A panchromatic ~ 20 -pc scale view of ISM in a sub- L_* galaxy at $z = 6$ by ALMA and JWST [26.5h]
8. ALMA 2022.1.00257.S, PI: PI T. Hashimoto: Deep [OIII] 88 μ m and dust continuum observations of two remarkably luminous galaxies at $z \sim 10$. [17.8 h]
7. ALMA 2022.1.00195.S, PI: Seiji Fujimoto: Golden Reference for Metallicity Measurements at $z=6-7$ by ALMA+JWST [24.5h]

6. ALMA, 2021.A.00022.S, PI: Seiji Fujimoto: Establishing the Golden Reference of Early Galaxy Studies at z 8-9 with [OIII]4363 detection in JWST ERO [9.2h]
5. ALMA 2021.1.00389.S, PI T. Hashimoto: Deep [OIII] 88 um and dust continuum observations of two remarkably luminous galaxies at $z \sim 10$. [17.8 h]
4. ALMA 2021.1.00247.S, PI S. Fujimoto: Golden Reference for Metallicity Measurements at $z = 6 - 7$ by ALMA+JWST. [19.2h]
3. ALMA 2021.1.00181.S, PI F.Valentino: Molecular gas and obscured SFR in a typical sub- L_* galaxy at $z = 6$. [19.4h]
2. ALMA 2021.1.00055.S, PI S.Fujimoto: Comprehensive ISM view down to a ~ 100 pc scale for a sub- L_* galaxy at $z = 6$ by ALMA, JWST, and JVL. [16.3h]
1. ALMA 2019.1.01702.S, PI F.Valentino: The physics of the ISM with CO and neutral CI: the final piece. [26.7h]

Observing Experience:

4. Keck, Instrument: MOSFIRE, 8 nights 2022 –
3. Nordic Optical Telescope (remote), Instrument: ALFOSC, 2 nights Aug 2021
2. Nordic Optical Telescope, Instrument: ALFOSC, 4 nights Feb 2020
1. IRAM 30m, Instrument: NIKA2, 5 nights Sep 2019

Academic Honours

Roman Space Telescope Cycle I Medium Proposal Funding \$450,000	2026
NASA Hubble Fellowship, \$350,000	2026 - 2029
Dunlap Visiting Postdoc, Dunlap Institute, University of Toronto, Canada $\sim$ \$5000	2026
Cosmic Frontier Center Prize Fellowship, UT Austin, USA, $\sim$ \$260,000	2024 – 2027
STScI Postdoctoral Fellowship, STScI, USA, $\sim$ \$300,000 (Declined)	2024 – 2028
Junior Research Associate (JRA) Bursary, £2000, University of Sussex	Summer 2017
Summer Research Placement Bursary, £1000, University of Sussex	Summer 2016
Summer Research Placement Bursary, £1000, University of Sussex	Summer 2015

Collaborations and Memberships

Leading Role: VENUS, GLIMPSE, UNCOVER, CAPERS, Cosmic Spring, ALMA Lensing Cluster Survey (ALCS)
Collaborator: CEERS, NGDEEP, MAGNIF, COSMOS - Web, DAWN, COSMOS, BUFFALO

Teaching & Supervision

Graduate Students:

Michelle Jecmen (joint with John Chisholm) Fall 2024 –

Undergraduate Students:

Noel Córdova (Summer Research Project) - UT	Summer 2025
Ira Ronayne (Summer Research Project) - UT	Summer 2025
Noah Miller (Summer Research Project) - UT	Summer 2025
Dominic Popp (Bachelor thesis co-supervisor) - Groningen	Spring 2023
Adrian Lopez (Caltech-SURF) - Copenhagen	Summer 2019

Teaching:

JWST/NIRCam Data Reduction Workshop, University of Toronto	Lecturer 2026
Galaxies (Undergraduate), UT Austin	Guest Lecturer 2026
Extragalactic Astronomy (Undergraduate), UT Austin	Guest Lecturer 2025
Interstellar Medium (3rd year), University of Groningen	Guest Lecturer 2023 – 2024

Teaching Assistant:

Astronomy and Cosmology (2nd year), Niels Bohr Institute,	Fall 2021
Thermodynamics Lab (1st year), Niels Bohr Institute	Spring 2021
Thermodynamics (1st year), Niels Bohr Institute	Spring 2020

Professional Service	– Referee for Nature	2024 – present
	– Referee for ApJ/ApJL	2021 – present
	– Referee for A&A	2023 – present
	– Referee for MNRAS	2022 – present
	– Organiser of weekly Cosmic Frontier Center science meetings, UT Austin	2024–present
	– Co-organiser of weekly science seminars, DAWN, Niels Bohr Institute	2019–2021
	– SOC, BUFFALO collaboration meeting (virtual)	Summer 2020
	– SOC and LOC, BUFFALO collaboration meeting, UNLV, Nevada	Feb 2019

Media	– NASA	
	- NASA Webb Finds Strongest Evidence Yet for ‘Black Hole Stars’	June 2026
	– Space.com interview	
	- James Webb Space Telescope ‘pushed to its limits’	November 2024
	– American Astronomical Society Nova Highlights:	
	- ”A GLIMPSE of the First Galaxies?”	July 2025
	- ”Little Red Dots and Big Black Holes”	May 2024
	- ”Making Sense of a Massive Black Hole in the Early Universe?”	November 2023
	– Interviewed by ”New Scientist” regarding high- z massive AGN	August 2023

Outreach	– Astronomy on Tap, Austin	June 2024
	– Astronomy on Tap, Groningen	December 2023

List of Publications

First and Second Author Articles:

14. **Kokorev, V.**, et al., The Ashes of Supermassive Stars: Globular Cluster-like Aluminum Enhancement in Little Red Dots, arXiv:2609.09271
